Table 1: Non-Plural Pronouns

- She/Her: used to refer to a single female person.
- He/Him: used to refer to a single male person.
- They/Them: used to refer to a single person of unknown gender or a group of people.
- Their: used as a possessive pronoun for a single person or a group.
- Theirs: used as a possessive pronoun for a single person or a group.
- Our: used as a possessive pronoun for a single person or a group.

In order to effectively communicate with others, it is important to understand and use the correct pronouns for each individual. The use of the wrong pronouns can lead to confusion and misunderstandings. Always use the pronoun that accurately reflects the gender of the person you are speaking to.
THE phylumBaseContext (1) is intersected in the phylum.

The caption of the figure: "Figures 1A and 1B show the results of the experiment."

The figure: A graph showing the relationship between two variables.
6.4.1 Domestic Water Supply and Sanitation (section 6.4.1)

Compliance with Section 6.4.1 is essential to meet the requirements of the National Building Code of Canada (NBCC). The sections of the NBCC that pertain to water supply and sanitation are outlined in this section. A brief overview of the key requirements is provided below.

- Water supply systems must be designed to ensure a sufficient supply of clean water.
- Sewage disposal systems must be designed to prevent the spread of disease and contamination.
- Water quality must comply with the standards outlined in the Canadian Public Health Act.
- Plumbing fixtures and equipment must be installed according to the NBCC standards.

6.4.2 Monitoring and Testing (section 6.4.2)

Regular monitoring and testing of water supply and sewage disposal systems are required to ensure compliance with the NBCC. This includes regular sampling of water and sewage for analysis to ensure that the quality meets the required standards.

6.4.3 Code Enforcement (section 6.4.3)

Local authorities are responsible for enforcing the NBCC and ensuring that all buildings comply with the requirements. Violations of the NBCC can result in fines and corrective action being taken.

6.4.4 Appeals (section 6.4.4)

Individuals or organizations who believe that they have been unfairly penalized or affected by an enforcement action can file an appeal with the appropriate authority.
